SOUNDS OF NATURE SPIRIT

Norse gong is a concept by Norwegian
Gongmaster Tor Arne Håve. It is an
idea to bring back a deep meaningful
connection to yourself, back to the
time where the runes (Norsemen Script
language) were used. Runes were at that
time also looked on with deep respect
and the people held them to be magical
symbols. Symbols that could express
the will of Norse Goddesses and Gods.
The runes were used in ceremonies to
create changes in the world as the outer
cosmos and in the inner cosmos, in the
man himself.

GONG ON THE WAY

NORSE GONG™ STAFF RUNE GONGS

NORSE GONG™ is an expression of
ancient shamanic traditions, a carrier of
light and sound from the voices of the
past into today's modern world.

Gongmaster Tor Arne Håve performing an ancient Norse FIRE & WATER ritual for Vegvisir gong.

THE Fire & Water Ceremony is based on the ancient myth of «the death of Balder» In this myth Frigg mother of Balder is making all elements and living beings make an oath to protect her Son Balder from being hurt or dying. Frigg first asks the Fire and Water. We do so not to protect ourselves from dying or to be hurt but to fill our life with a content of truthfulness, aliveness and joy. So when we are alive we do not seek for immortality but for a real way of being. Therefore we ask the gongs to guard us with the help of all elements, but first of all Fire & Water.
